

## SAPGUI 7.40 Installation and Upgrade

If the operating system is Windows **Vista, Windows 7 or Windows 8 or Windows 10** you may have to disable the User Account Control (UAC). If your first install attempt exits within 30 seconds you must disable UAC and try again. Note: please see prerequisite for [Windows 10 installation](#) and update.

### To disable UAC in VISTA:

1. Launch MSCONFIG from the Run menu.
2. Click on the Tools tab.
3. Scroll down till you find "Disable UAC".
4. Click on that line.
5. Press the Launch button.
6. A CMD window will open. When the command is done, you can close the window.
7. Close MSCONFIG.
8. You need to reboot the computer for changes to apply.

### To disable UAC in WINDOWS 7/8:

1. Click on Start
2. Click on Control Panel
3. Click on System and Security
4. In the Action Center section, click on Change User Account Control Settings.
5. Drag the slider to "Never Notify".
6. Click OK.
7. The system will prompt you to reboot.

### To disable UAC in WINDOWS 10:

1. Click on Start
2. Type in UAC in the Search Windows area
3. Click on the Change User Account Control settings
4. In the Action Center section, click on Change User Account Control Settings.
5. Drag the slider to "Never Notify".
6. Click OK.
7. The system will prompt you to reboot.

## **UPGRADE (uninstall previous SAP GUI)**

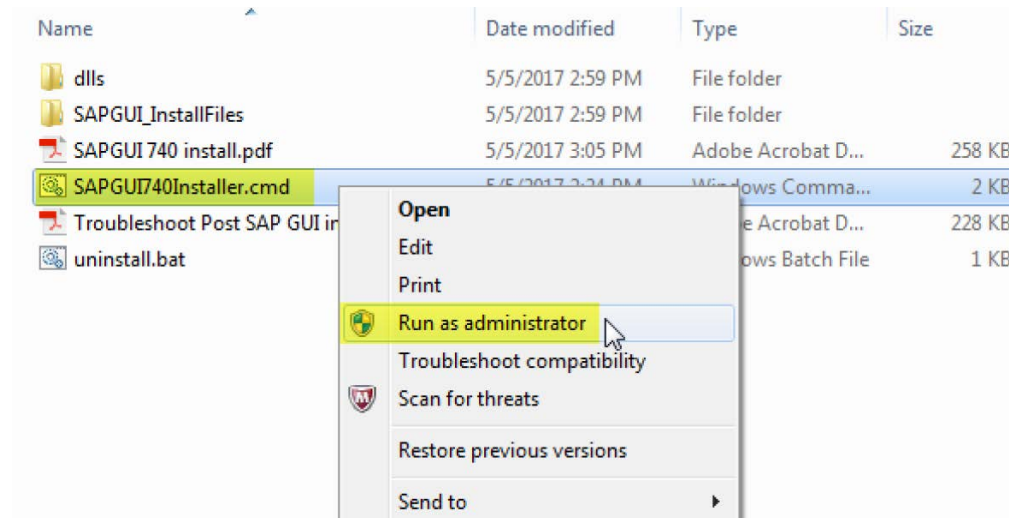

- Log on to PC as user with local admin rights
- Ensure all applications are closed. A/V software should be OK to leave running.
- In Control Panel, go to the Add/Remove software or Programs & Features, uninstall both:
  - o SAPGUI for Windows (whatever version is present)
  - o SAP Business Explorer
- Reboot machine and perform Installation (below)

## **INSTALLATION**

**\*Windows 10 installation will require enabling the .NET Framework 3.5 (Including .NET Framework 2.0 & 3.5) prior to launching the **SAPGUI740Installer.cmd** file.**

The SAPGUI740Installer.cmd must be execute from the downloaded install package with “Run as administrator” escalated privilege.

Right mouse click on the file SAPGUI740Installer.cmd and select “Run as administrator” as shown below.

- Wait for install to complete...
- You may be asked to Press any key to continue
- Enable UAC if previously disabled and desired
- To run SAP GUI, click on Start >> All Programs >> SAP Frontend >> SAP Logon Pad
